## Long 'U' configuration

**Note:**

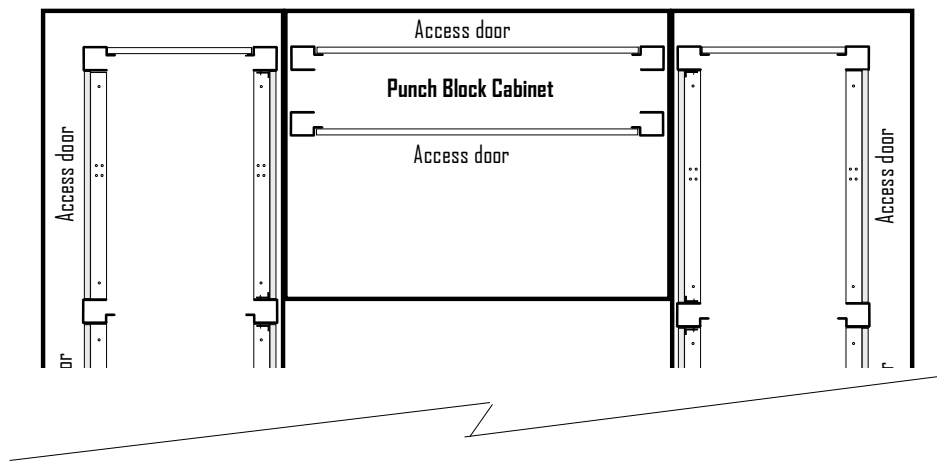

The rear access doors can be secured by magnetic touch latch or two screws.

**Pedestal Racks**

Sitdown height = 13RU  
Standup height = 16RU

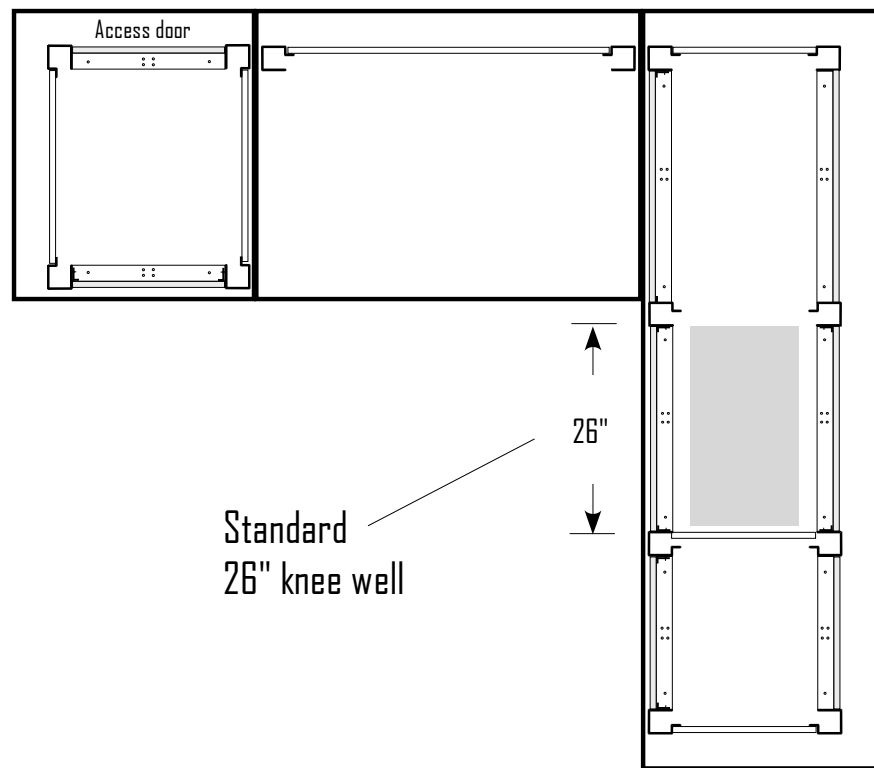

## Punch Block Cabinet

The "Punch Block Cabinet" is designed to house wiring and punch blocks (if used). It can also be used simply as a wire channel to conveniently hide console and source gear cabling. The front and rear panels are removable with four screws to provide easy access.

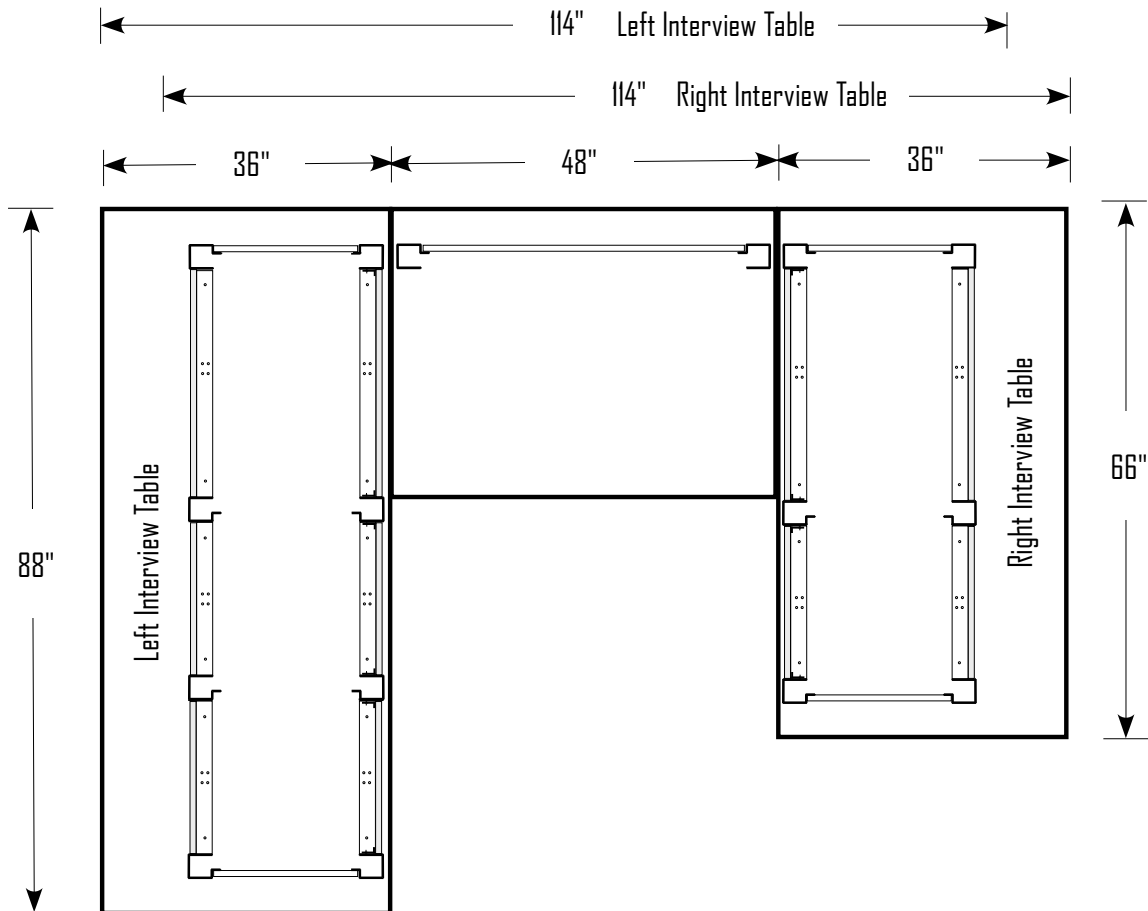

## Knee wells

At times it is desirable to replace a pedestal cabinet with a knee well so that the operator can use certain types of tabletop equipment. The standard ACCESS knee well width is 26". The addition of a 26" knee well adds 7" to the overall length of the pedestal return. Other widths are optionally available.

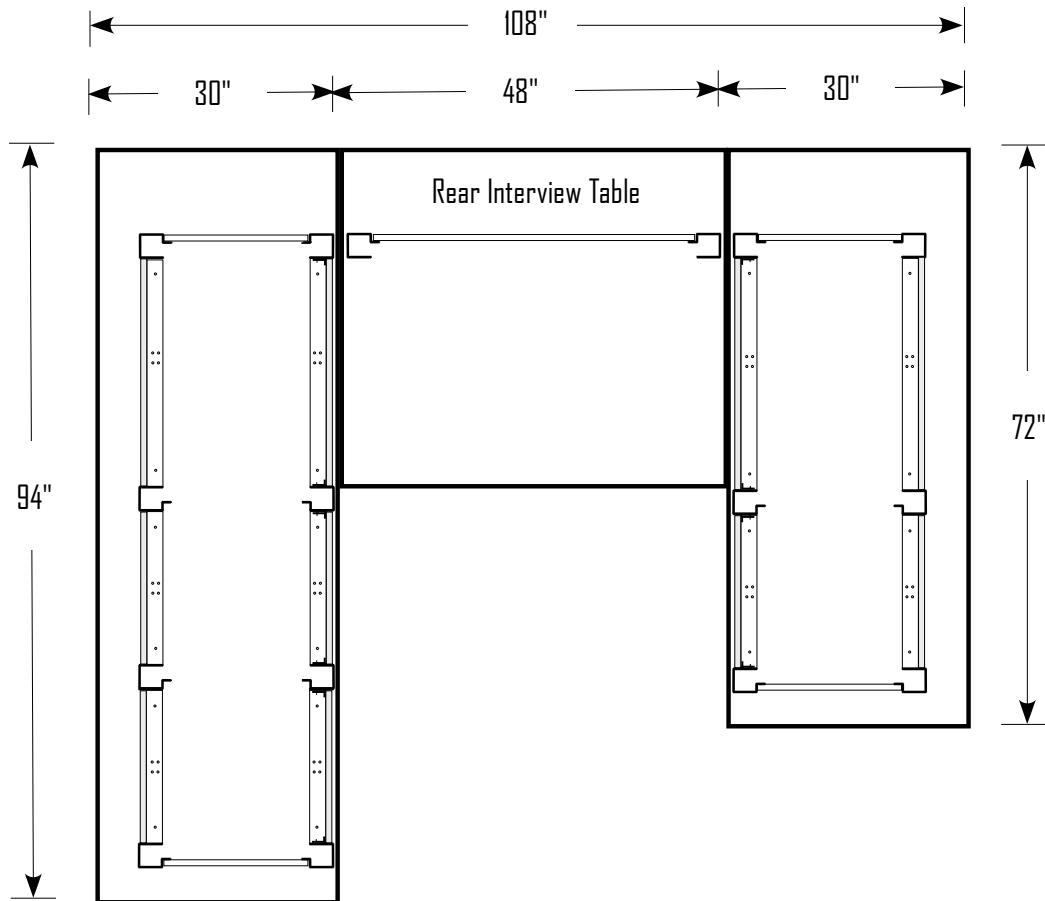

## Left and Right side Interview tables (11" overhang)

**Note:**

11" is the standard conference desk interview depth. Other interview depths can be custom selected

## Rear Interview table (11" overhang)

**Note:**

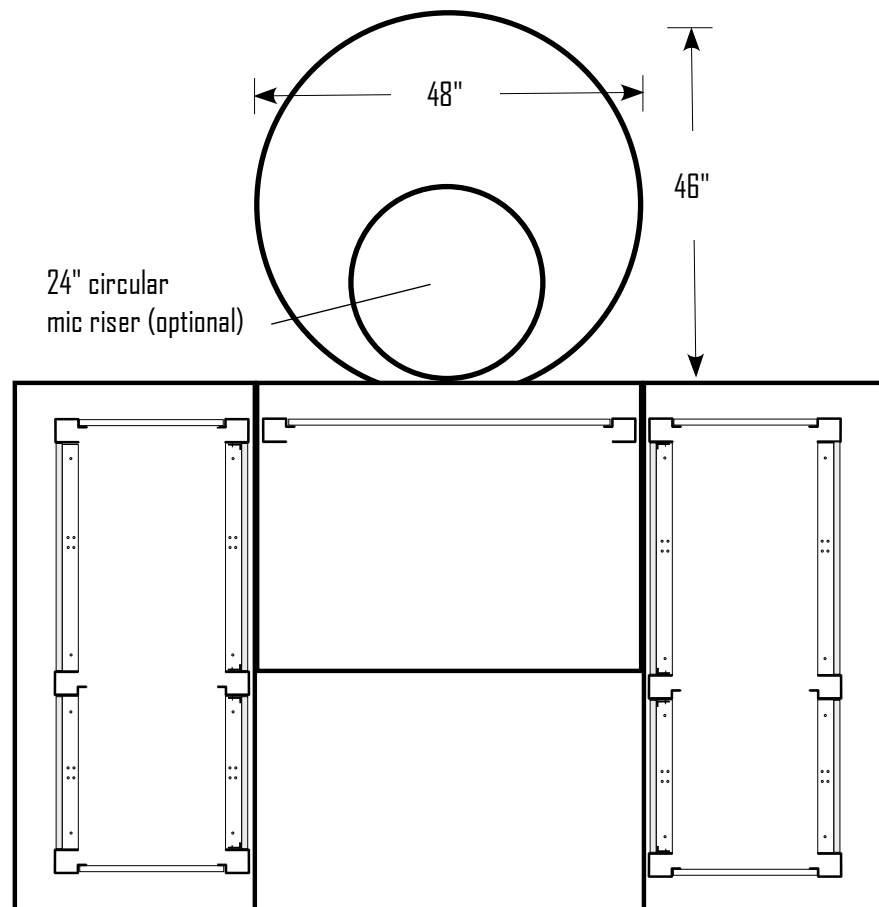

11" is the standard conference desk interview depth. Other interview depths can be custom selected.

## Circular Rear Interview table

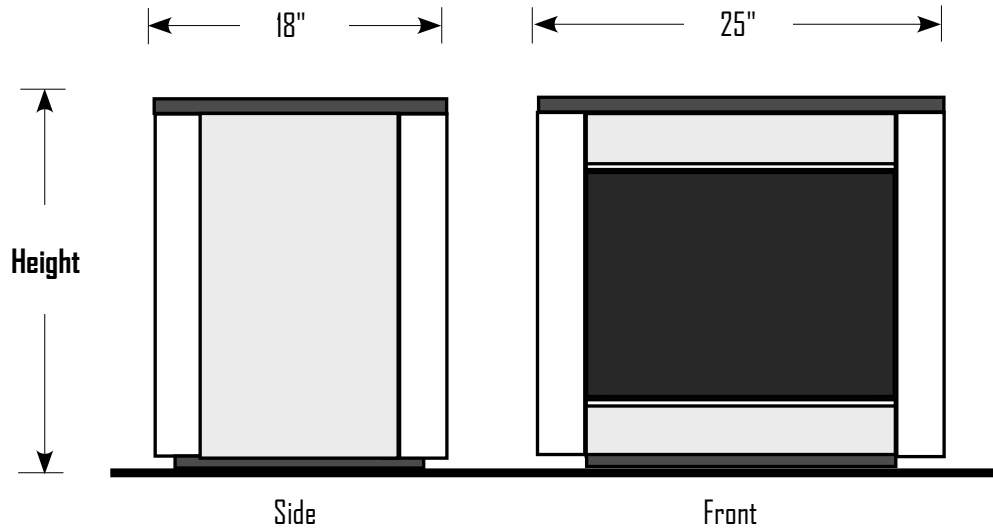

Ideal for mic studio applications requiring 3-4 mics, the circular interview table adds style to any studio.

The optional 24" circular mic riser provides an attractive way to manage the mic booms on the table.

Note: the circular table can be placed anywhere around the edges or corners of the studio

## Tabletop Equipment Rack Pod

### Height

8RU	Height = 22 1/2"
13RU	Height = 31 1/4"
16RU	Height = 36 1/2"

### Note:

The rear access door can be secured by magnetic touch latch or two screws.
